About Me

My name is Maks. I am three-year student at BSUIR(average mark is 9.13).

My goal is to become a real specialist.

Now I haven't experience in commercial development, but I think I'll suit the company because I'm ready to study and work hard, by the way I learn material quite fast.

Except this I know how to work in the team. I'd like to get a job as Intern or Junior Java Developer.

English level: Intermediate(B1).

Education

High Education:

Automatic Information Processing Systems, Faculty of Information Technologies and Control,

Junior Java Developer

Pet-projects

Computer equipment online-market.

Description: App allows you to authorize in two roles: administrator and client.

As administrator you can do CRUD operations with each entity, administrate users, export data from database to json file and import data from json to database.

As client you can scroll page with products, add each product to cart, edit your personal information, update avatar and password. When you create order system sends email with information about order in PDF.

I realized filtration and pagination for each page with products, producers, etc.

Languages: Java, SQL, JavaScript, HTML, CSS.

Technologies: Spring (Boot, Security, Data Jpa, Data Jpa Specifications, MVC), Java Mail, Jackson, Thymeleaf, Maven, PostgreSQL, Liquibase, ModelMapper.
